G. SANTIAGUE: Response Coordinator

Global Confederation for Promotion and Development : represented by Ms. EMILIENCE M. PIERRE-LOUIS

Activities to be undertaken

a- Target areas and selection of beneficiaries;

b- Number of beneficiaries;

c- Distribution of aid;

d- Media coverage;

e- Public Relations.

a- Target areas and selection of beneficiaries;

Haiti Red Cross has targeted the district of Mais Gate to give this special food assistance. The district is part of Delmas commune, one of the more affected by the COVID-19. The 600 beneficiaries will be selected from this disadvantaged and marginalized area. Haiti Red Cross will select families with a minimum of 5 people, that's mean 3000 people will be covered. Each family will choose the family member who will receive the kits at the site that the Haiti Red Cross and community leaders will choose.

In addition to the household criterion of 5 people, Haiti Red Cross will based the selection of the beneficiaries on criterion like : single-parent families with more than (5) children, the elderly, widows and widowers, divorced or separated without income ; households with single pregnant women, single breastfeeding women; households that have not received substantial assistance from the government and other organizations; households with disabled person (s) and other socially excluded groups; households with few coping mechanisms and which are structurally vulnerable to shocks;

In order to improve the process of capturing, recording and verifying information, Haiti Red Cross will use the **Open Data Kit** (ODK) to register beneficiaries using smart phones. A virtual server and computers will be used to carry out the tasks relating to the processing and dissemination of information. The selection of beneficiaries will be done jointly by Haiti Red Cross volunteers, local authorities and community leaders in mix teams men and women. The teams will be equipped with a cell phone, a spray to mark the houses and the tickets to be distributed. Each sector will be covered by an assigned team. If it is determined that the family respect the criteria, the information must be recorded according to the Open Data Kit system and the ticket will be given to the head of the household.

During this meeting with the beneficiaries, it is imperative to inform the beneficiary about:

- The date, time and place of the distribution;
- The weight of the kit, it is therefore necessary to recommend to the head of household to come accompanied;
- Possible security issues. The beneficiary must be vigilant and, if possible, travel in a group.

b- Number of bénéficiaires

Items	Quantity (bags)	Number of beneficiaries	Comments
Rice	600	3,000 (600 households)	1 bag of rice, ¼ bag of beans
Beans	150		
Total		3,000	

HRC is in current negotiation with a local company (**CARIBEX**) that may donate some additional items to add to the kits:

- cooking oil and
- cooking butter

N.B. Each bag of beans will be divided into four equal parts to be able to assist 600 households.

c- Distribution of aid

During distribution, beneficiaries with their card stamped with a bar code will be served with the support of the **Mega V** application which will allow HRC to very quickly assist beneficiaries while respecting social distancing measures and restrictions on rallies as part of Covid-19. Each beneficiary

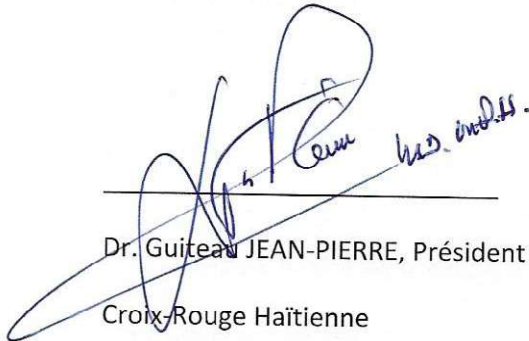

will receive one bag of rice and ¼ bags of beans. HRC volunteers will be used to divide and pack the beans.

d- Media coverage

The whole process won't be covered, but on the day of the distribution, Haiti Red Cross will invite National and other Medias to cover this specific activity.

e- Public Relations

Banners and stickers with **HRC** and donors' logos will clearly be posted to maximize visibility of this humanitarian activity.
